## INTRODUCTION

The Ministry of Civil Service and Administrative Reforms (MCSAR) has sought and obtained Cabinet approval for the conduct of the Customer Satisfaction Survey (CSS) across the Civil Service. A survey was conducted for the Civil Status Division (CSD) falling under the aegis of the Prime Minister's Office. The main objectives of the survey were to determine the level of customer satisfaction with the 5 different service components (Accessibility, Reception and Waiting Area, Interaction with Service Provider, Service Delivery and Handling of Complaints) for the 8 different types of services provided by the Civil Status Division and to solicit customers' suggestions for improvement in each service area. The survey was carried out from 18<sup>th</sup> to 29<sup>th</sup> July 2016 by officers of MCSAR in collaboration with Statistics Mauritius (SM), which was responsible for the drafting of questionnaire, organization of fieldwork, tabulation, analysis and report writing.

This report presents the main results of the Customer Satisfaction Survey based on data collected from a sample of 1,000 customers in all 33 Civil Status Offices across the Island of Mauritius. Section 1 of the report presents the main findings such as the profile of the respondents including severity of disability and purpose of visit and time spent at the Civil Status Office. Section 2 presents the rating of the different services by the respondents and the suggestions for the improvement of these facilities. The methodology, concepts and definitions are given at section 3 and the detailed tables are at section 4. The questionnaire is at Annex.

## **Section 3: Methodology**

### **3.1 Data Collection**

#### **Survey period**

The survey was conducted for two weeks in the month of July for the year 2016. During the two weeks, interviews were carried out at the Civil Status Offices between 0845 and 1600 hours. This ensures representativeness of the customers who benefited from the services at the Civil Status Offices throughout the day.

#### **Unit of enquiry**

The unit of enquiry is the customer. The latter is defined as a person who has just been provided with the service he/she had requested from the Civil Status Office.

#### **Questionnaire design**

The views of the stakeholders, namely the Ministry of Civil Service and Administrative Reforms and Civil Status Division, were sought regarding the content of the questionnaire. The questionnaire comprises 43 questions (*see Annex*), including 2 opinion questions on reasons for not being satisfied with the service delivery and suggestions for improvement.

#### **Data collection method**

Data were collected on tablet PCs and face to face interviewing technique was used.

#### **Fieldstaff**

The fieldstaff consisted of 1 Chief Supervisor, 2 Supervisors and 15 Interviewers.

#### **Consistency and validation checks**

The data capture application on the tablet PCs flagged errors at data collection and were corrected on the spot. In addition, supervisors monitored the interviews being carried out and advised the interviewers on remedial action to be taken, if warranted.

### **3.2 Sampling**

#### **Sample method**

Based on the information available at the Civil Status Division, the expected number of customers by the type of services distributed among the 33 Civil Status Offices for the two weeks of July 2016 was assumed to be the same as in July 2015. Therefore, the sample was allocated proportionately to the 33 Civil Status Offices and by type of services.

Moreover, the selection of customers to be interviewed in each of the offices has been done by quota sampling. To ensure representativeness of the sample over factors which may influence the responses, the following quota controls were considered:

Time of interview

Morning: 0900 – 1100 hrs

Mid-day: 1100 – 1400 hrs

Afternoon: 1400 – 1600 hrs

It is noteworthy that only adults age 18 years and above were being interviewed for the purpose of this survey.

### **Sample size**

A sample size of 1,000 was considered appropriate after considering the resources to be put in place for the survey and the timeliness at which results will be disseminated.

### **Pilot Survey**

A pilot survey was carried out on the 12<sup>th</sup> July 2016 at the Central Civil Status Office, Port Louis.

### **Data reliability**

The results published in this report are based on a sample, rather than the census of all customers who benefited the services of the Civil Status Offices. As with all sample surveys, the results are subject to sampling variability and therefore may differ from figures that would be obtained if all customers had been included in the survey.

## **3.3 Data Processing**

The whole data processing exercise was done in-house using the CSPro software and Microsoft Spreadsheet.

## **3.4 Problems/Limitations**

As with all sample surveys, the Customer Satisfaction Survey is subject to weaknesses including:

- In few Civil Status Offices, the expected quota could not be respected as the number of customers anticipated to visit the Civil Status Offices for certain services was not attained. In this context, the next customer requesting for any service at the Civil Status Offices was considered for the interview.
- ‘Acknowledgement service’ available at all Civil Status Offices was not covered as a result of the minimal number of customers received in a year.

### 3.5 Definition of terms
